**MITIGATION MEASURES**

The following guidelines are recommended by the CDC, but may be superseded by Executive Order of the Governor.

**FULLY VACCINATED**

- You can resume activities that you did prior to the pandemic.** To reduce the risk of being infected with the Delta variant and possibly spreading it to others, wear a mask indoors in public if you are in an area of substantial or high transmission.  
- Fully vaccinated people who have a known exposure to someone with suspected or confirmed COVID-19 to be tested 3-5 days after exposure, and to wear a mask in public indoor settings for 14 days or until they receive a negative test result.  
- CDC recommends universal indoor masking for all teachers, staff, students, and visitors to schools, regardless of vaccination status.  
- You should still watch for symptoms of COVID-19, especially if you’re around someone who is sick. If you have symptoms of COVID-19, you should get tested and stay home and away from others.  

**SMALL GATHERINGS**

- Limit the number of guests to allow people to remain at least 6 feet apart.  
- Host outdoor gatherings when possible.  
- Encourage unvaccinated guests to wear masks.  
- Clean frequently touched surfaces and items between use.  
- If gathering indoors, increase ventilation by opening windows and doors or by placing central air and heating on continuous circulation.  
- Encourage guests to wash hands often. Have a separate space for guests to wash their hands or provide hand sanitizer.

**INDOOR ACTIVITIES**

- Stay home if sick.  
- Use online services when available.  
- Wear masks in public settings and when around people who don’t live in your household, especially when other social distancing measures are not possible.  
- Use social distancing (stay at least 6 feet away from others).  
- Use hand sanitizer after touching surfaces.  
- Wash your hands with soap and water for at least 20 seconds when you get home.

**OUTDOOR ACTIVITIES**

- Stay home if sick.  
- Wear a mask when:  
  - Attending small or crowded outdoor gatherings when social distancing is not possible.  
  - Dining at an outdoor restaurant with friends from multiple households.  
- Use hand sanitizer after touching surfaces.  
- Wash your hands with soap and water for at least 20 seconds when you get home.

**LARGE INDOOR GATHERINGS**

- Stay home if sick.  
- Wear masks in public settings and when around people who don’t live in your household, especially when other social distancing measures are not possible.  
- Use social distancing (stay at least 6 feet away from others).  
- Use hand sanitizer after touching surfaces.  
- Wash your hands with soap and water for at least 20 seconds when you get home.

**ALL PUBLIC TRANSPORTATION**

You will still be required to wear a mask on planes, buses, trains, and other forms of public transportation traveling into, within, or out of the United States, and in U.S. transportation hubs such as airports and stations.
